DETAILED ACTION**CLAIMS PRESENTED**

As noted in the Response from applicant, the claims corrected a few minor typographical errors. No change has been made to overcome the art.

Response to Arguments

Applicant's arguments filed have been fully considered and they are persuasive in some matters but they are not persuasive not persuasive in other matters. Due to considerations of proper equity and proper procedure, the finality of the previous Office Action is withdrawn. Instead, this present Office Action is made final.

The issue, according to Applicant, is whether the prior art teaches "authenticating a provisioning server" in the context of other limitations of the claims. Why would one authenticate a provisioning server? One may note that a provisioning server is critical to the user. After all, the provisioning server may handle monetary and identity and service issues. That a critical server be authenticated by a user is well known in the art for the motivation of security. On many services, a user has an account. This account needs to be authenticated by a user by authenticating the server for security purposes such as to prevent fake servers from gaining the user's information. This is common. This is inherent to any critical server situation. Is a provisioning server a critical server? For the reasons noted in the previous sentences of this paragraph, a provisioning server is a critical server.

Art Unit: 2134

Thus, the rejections of the previous Office Action are deemed to be correct.

CLAIM REJECTIONS

Claim Rejections - 35 USC § 102/103

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
